

Quick Release Mounts for Sim Rigs

QR4rigs®

Change your rig in seconds, spend more time in the game!

The QRMax System is designed for rapid mount/dismount of large controllers on your rig!

Note: you will need a QRMax Base Mount to use this adapter.

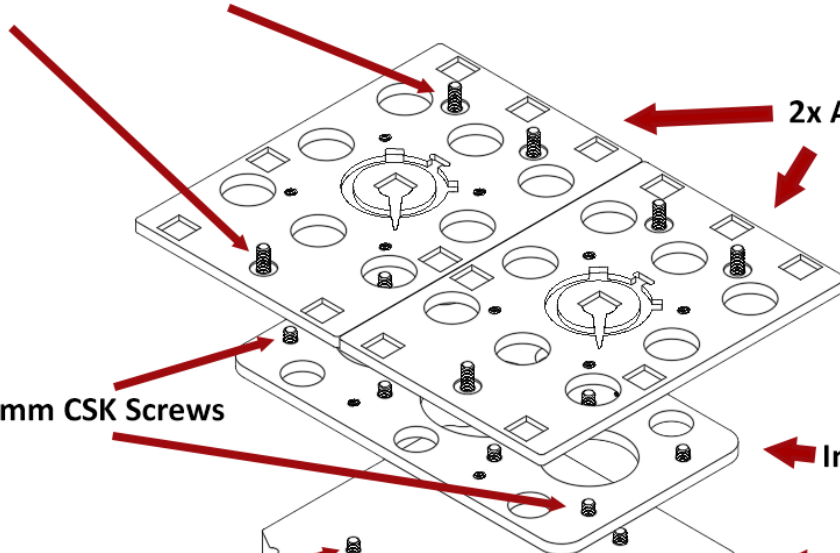

Fitting the QRMax Thrustmaster TCA Boeing Throttle QR Plate Kit

This adapter is designed to fit to two TCA Boeing Throttle units only.

- The QRMax TCA Boeing Throttle QR Plate Kit comes in 4 main parts and fixings, ready for assembly.
 - 2x Adapter Plates
 - 1x Interface Plate
 - 1x QR Plate
 - Fixings:
 - 6x M6x18mm CSK Screws
 - 8x M6x10mm CSK Screws
 - 4x M6x16mm CSK Screws

6x M6x18mm CSK Screws

2x Adapter Plates

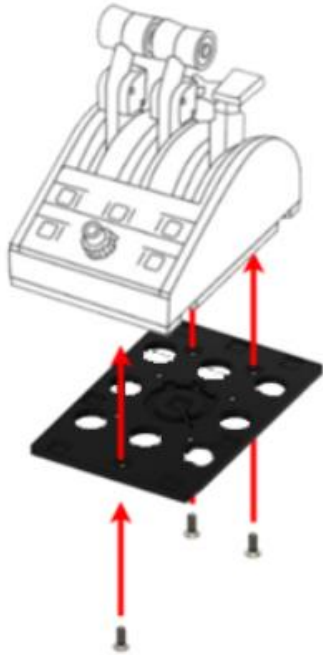

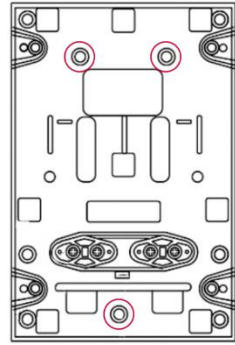

8x M6x10mm CSK Screws

Interface Plate

4x M6x16mm CSK Screws

QR Plate

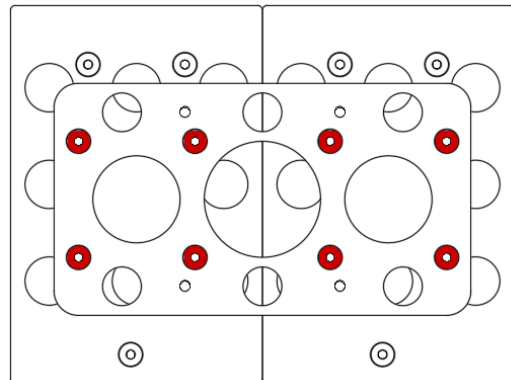

- Flip over each TCA Boeing Throttle and locate the 3 mounting M6 holes on the bottom highlighted in red circles in the picture on the right.

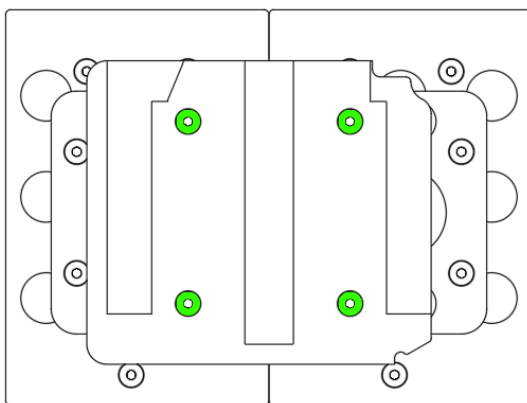

- Use 3x M6x18mm CSK Screws provided through the base of each of the Adapter Plate's 3 mounting holes and fix into the base of both the TCA Boeing Throttles.

- Tighten to the pinch then 1/16th turn.

- Fit the Interface Plate to the base of the Adapter Plates using the M6x10mm CSK Screws provided (highlighted in red in the picture on the right).

- Tighten to the pinch then 1/16th turn.

- Use 4x M6 x 16mm Screws provided to secure the QR Plate to the bottom of the Interface Plate (highlighted in green in the picture on the left).

- Tighten to the pinch then 1/16th turn.

- The QR Plate can be fitted to the interface plate to suit forwards (as shown) or rearwards mounting options if rotated through 180°.

Do NOT overtighten any of the screws, you may damage the plastic threads.
