

Quick Release Mounts

4 Sim Rigs

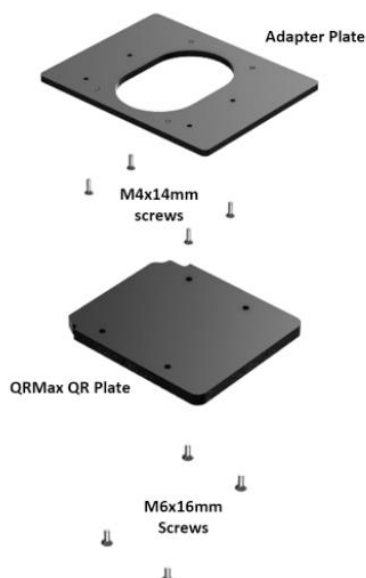

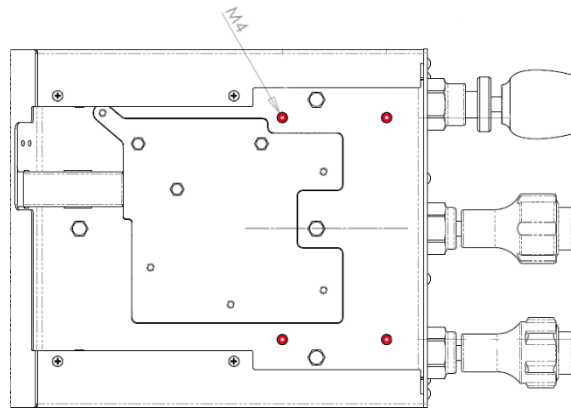

Change your rig in seconds, spend more time in the game!

The QRMax System is designed for rapid mount and dismount of Wheels, Yokes and Throttle Quadrants to and from your rig

Note: you will need a QRMax Base Plate to use this adapter.

Fitting the QRMax VirtualFly V3RNIO+ Plate to your VirtualFly V3RNIO+ Controller

- Identify the 4x M4 threaded mounting holes on the base of your VirtualFly V3RNIO/V3RNIO+ highlighted here in **RED**

- First attach the Adapter Plate to the base of the VirtualFly V3RNIO/V3RNIO+ using the 4x M4x14mm (smaller) screws provided. Note the orientation
- Tighten to the pinch + 1/16th turn.
- Next, attach the QRMax QR Plate to the Adapter Plate using the 4x M6x16mm Screws provided. Note the orientation.
- Tighten to the pinch, do not overtighten and take care not to cross the threads to avoid damaging the plastic.
